TECHNICAL SKILLS

Programming Languages - JavaScript / TypeScript / C# / Python

Frameworks & Libraries - React / Next.js / Gatsby / Node.js / ASP.NET / SQL Server

Tools & Others - Git / Postman / AWS / Google Analytics / GraphQL

EXPERIENCE

2018 – 2023
Baton Rouge, LA

React Engineer

Acentra Health / Kepro / eQHealth Solutions

- Spearheaded React development efforts for a population health management and healthcare IT solutions suite, serving 70+ federal, state, and commercial clients in the USA.
- Executed the migration, optimization, and redesign of application views from ASP.NET Web Forms to React, enhancing user experience and decreasing load times by half.
- Resolved 500+ high-priority vulnerabilities and accessibility problems impacting the entire application suite, eliminating critical security incidents and improving integrity and usability.
- Implemented a React TypeScript admin dashboard for controlling system settings, permissions, and correspondence processing, eliminating manual tasks and halving turnaround time.
- Ensured that frontend components submitted by fellow engineers complied with requirements and current standards, reducing post-launch defects and securing positive client feedback.

2015 – 2018
New Orleans, LA

Software Developer

CivicSource

- Overhauled tax management application by redesigning and migrating Razor views to React, streamlining admin work by improving usability and user experience.
- Enhanced tax and foreclosure sales application by developing 100+ new features (React JavaScript & Redux, Knockout.js, C#, SQL Server) and automated test cases (Mocha, MSTest).
- Led the design and development of a careers-centered website using Grunt, Metalsmith, and Handlebars, generating a 60% upsurge in direct job applications.
- Conducted code reviews and performed candidate interviews in support of dev team expansion.

2014 – 2015
New Orleans, LA

Research Assistant

University of New Orleans

- Engineered a forensic tool for API-based evidence acquisition from cloud storage services using Python and Flask, work published in Elsevier's Digital Investigation Journal (Vol 18, Pages 79-95).
- Developed a lightweight infrastructure for hands-on network security education, integrating Docker, Vagrant, and AWS.
- Coached high school educators about fundamental cybersecurity concepts in an NSA-sponsored training program (GenCyber).

2012 – 2013
Guayaquil, Ecuador

Webmaster II

Banco Territorial

- Directed 10+ high-priority enhancements and resolved multiple bugs for a transactional system built with ASP.NET.
- Established routine penetration tests on the transactional system and web applications, resulting in the preemptive detection and fixing of several security vulnerabilities.
- Programmed new microservices while collaborating with cross-functional teams, ensuring seamless integration of new features into other department operations.

2011 – 2012
Guayaquil, Ecuador

Webmaster

Dinamo Consulting

- Achieved the digital transformation of several national and international clients by designing, developing, SEO-optimizing, and deploying CMS-powered web storefronts for their businesses.
- Managed and maintained multiple company-owned databases and servers.

EDUCATION
